

VAIBHAV VERMA

Software Engineer | Full-Stack Developer | Backend & REST API Specialist
Ayodhya, India | +91 7985859506 | vaibhav.verma.sde@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Pre-final year B.Tech Computer Science student and MERN Stack Developer with hands-on experience building scalable full-stack applications. Specialized in Node.js, Express.js, MongoDB, REST APIs, and secure authentication. Hands-on exposure to AWS cloud services (EC2, S3, IAM) through practical cloud labs. Solved 290+ DSA problems on LeetCode and passionate about building clean, maintainable software.

SKILLS

Languages: Java, JavaScript, Python

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Passport.js

Frontend: React.js, Next.js, HTML5, CSS3

Database: MongoDB, SQL

Cloud & DevOps: AWS (EC2, S3, IAM basics), Vercel

Core Concepts: Data Structures & Algorithms (290+ LeetCode), OOP, DBMS, Operating Systems

Tools: Git, GitHub, VS Code, Postman

PROJECTS

Digital Mandi – Smart Agriculture Marketplace

Mar – Apr 2026

Tech: Node.js, Express.js, MongoDB, React.js, REST APIs | [Live Demo](#) | [GitHub](#)

- Designed and deployed a full-stack marketplace on Vercel connecting farmers and traders for direct crop trading, handling end-to-end user workflows.
- Engineered scalable REST APIs for product listing, bidding, and user management, following clean architecture principles.
- Implemented a real-time bidding engine managing concurrent user interactions for transparent price discovery.
- Optimized MongoDB queries, reducing API response time by ~25% through indexing and query restructuring.
- Enhanced API reliability with structured error handling, middleware validation, and performance observability.

Smart Bus Booking System

Jul – Nov 2025

Tech: React.js, Node.js, MongoDB, JavaScript, HTML, CSS | [Live Demo](#) | [GitHub](#)

- Built and deployed a production-ready full-stack application with real-time booking workflows, seamlessly integrating frontend and backend systems.
- Designed a scalable backend architecture with comprehensive REST APIs; performed CRUD operations using MongoDB for users, bookings, and routes.
- Implemented secure form validation and optimized database queries, reducing API latency by ~30%.
- Collaborated with a team across requirement analysis, UI design, and testing — mirroring a cooperative engineering environment.

Secure Student Portal & Admin Analytics System

Jan – Mar 2026

Tech: Node.js, Express.js, MongoDB, Passport.js, EJS | [Live Demo](#) | [GitHub](#)

- Implemented secure multi-role authentication (RBAC) with Passport.js and built a centralized student dashboard with activity tracking.
- Improved query performance through MongoDB indexing strategies and designed a real-time analytics module for admin monitoring.
- Enhanced backend reliability by optimizing routing architecture and improving logging mechanisms for production observability.

EXPERIENCE

Full Stack Developer Intern – GLA University, Mathura

Jun – Jul 2025

- Developed responsive web interfaces using HTML, CSS, and JavaScript with dynamic DOM manipulation and robust form validation.
- Designed and integrated backend APIs for application functionality, data management, and client-server communication.
- Collaborated with team members across UI design, requirement analysis, and QA testing — shipped the Smart Bus Booking System as capstone project.

EDUCATION

B.Tech in Computer Science – GLA University, Mathura

Expected Jun 2027

Diploma in Electrical Engineering – Govt. Polytechnic Ayodhya

Sep 2023

Intermediate (Class XII) – Diamond Inter College, Rampur Bhagan, Ayodhya

Jun 2020

High School (Class X) – Diamond Inter College, Rampur Bhagan, Ayodhya

Apr 2018

ACHIEVEMENTS & ACTIVITIES

- Solved 290+ DSA problems on LeetCode — demonstrates strong algorithmic thinking and computer science fundamentals.
- Attended GDG session featuring Anshaj Sharma (SDE II, Amazon) on industry engineering practices and best practices in software development.
- All three major projects deployed live to production on Vercel, demonstrating full ownership from development to deployment.
