EDUCATION

Bachelor of Technology in Computer Science, <i>GLA University, Mathura</i>	June 2027
Diploma in Electrical Engineering, Government Polytechnic Ayodhya	Sep 2023

INTERNSHIP/ TRAINING EXPERIENCE

Full Stack Developer Intern (Project-Based), GLA University, Mathura *June 2025 – July 2025*

- Gained hands-on experience in HTML, CSS, and JavaScript fundamentals for web development.
- Understood concepts of DOM manipulation, event handling, responsive layouts, and form validation.
- Built a full-stack project titled “Smart Bus Booking System”.
- Collaborated with peers in requirement gathering, UI design, and testing phases.

PROJECTS

Portfolio (Projects, Skills & Resume): <https://vaibhav-verma-portfolio.netlify.app>

Digital Mandi – Smart Agriculture Marketplace (March to April 2026)

Tech Stack: Node.js, Express.js, MongoDB, React, REST APIs

- Built a full-stack platform connecting farmers and traders for direct crop trading
- Developed REST APIs for product listing, bidding, and user management
- Implemented real-time bidding system for transparent price discovery
- Designed backend workflows for handling transactions and user interactions
- Optimized database performance and API response time
- Leveraged AI tools for debugging APIs and optimizing backend performance

GitHub: <https://github.com/vaibhavverma389/digital-mandi>

Smart Bus Booking System (July to Nov 2025)

Tech Stack: React, JavaScript, HTML, CSS, Node.js, MongoDB

- Built and deployed a production-ready full-stack application handling real-time booking workflows and REST APIs
- Designed scalable REST APIs and handled real-time booking workflows
- Performed CRUD operations using MongoDB for managing users, bookings, and routes.
- Optimized database queries to improve response time and performance.
- Implemented form validation and ensured secure data handling.

Secure Student Portal & Admin Analytics System (Jan to March 2026)

Tech Stack: Node.js, Express.js, MongoDB, Passport.js, EJS

- Implemented secure authentication and role-based access control using Passport.js
- Built a centralized student dashboard for exam resources, notifications, and document access
- Implemented real-time activity tracking with optimized request handling for improved performance
- Designed analytics system to track user behavior and platform usage
- Improved backend reliability by optimizing logging and reducing unnecessary route noise

SKILLS

Backend: Node.js, Express.js, REST APIs, JWT Auth

Programming: Java, JavaScript, Python

Database: MongoDB, SQL

Frontend: React.js, Next.js, HTML, CSS

Tools: Git, GitHub, VS Code, Postman

ACHIEVEMENTS & ACTIVITIES

- Solved 260+ DSA Problems on LeetCode
- Participated in “Behind the Code” online webinar organized by GDG, featuring industry insights from Anshaj Sharma (SDE II, Amazon).
